Alastor

Alastor

Property	
Age	Adult
Birthplace	Sithyrya (Turandar)
Occupation	Inventor / Weaponsmith / Architect
Recruitable	Yes (Found at the Pirate Base)
Species	Sithyryan Dragon
Dick Size	Large ("Dragon Cock")
Relationship	Casual / Manipulative / BDSM
Role	Sadistic Dominant Top

> “Look at you, choking on dragon cock for a fucking mining tool. If the others could see their captain now...

Appearance

A winged Sithyryan dragon with taut scales, clawed hands, a tail, and a surprisingly brilliant, albeit twisted, mind.

Personality

Alastor is a genius engineer and inventor, but he is highly manipulative, cynical, and openly sadistic. He harbors a deep hatred for his home planet of Sithyrya due to a past tragedy in his hometown of Turandar, taking years to forgive the "faceless strangers" of his world. He takes

immense pleasure in tricking the Captain and utilizing his technological creations for sexual humiliation.

Story

You first discover Alastor working in the Workshop (Section 3-D) of the Pirate Base. After you rescue him, he joins your crew to upgrade your weaponry. Later, he plays a crucial role in the reconstruction of the ruined city of Ra'Kash on Sithyrya, using his advanced, fast-drying architectural inventions to rebuild the city.

Spicy Scenes

Alastor's scenes revolve heavily around technological bondage and forced submission:

- **The Thauselite Pickaxe:** When you need a Thauselite Pickaxe to mine on Erebus-1, Alastor demands payment in the form of oral sex. He will ruthlessly face-fuck you, pumping an impossible amount of thick, metallic-tasting, musky dragon cum down your throat until you are completely overflowing.
- **The Handcuff Game (Rebuilding Ra'Kash):** Under the guise of "testing" a new invention, Alastor tricks you into wearing a pair of technologically advanced handcuffs. Once your hands are locked behind your back, he offers your helpless body to Mayor Fergus and the local construction workers, forcing you to service them.
- **The Remote Control Bands:** Later during the reconstruction, Alastor equips you with remote-controlled bands on your wrists and ankles that freeze your muscles in place. He leaves you immobilized as a "temple whore" for the entire work crew, resulting in grueling, hours-long gangbangs and watersports while he watches.
- **TV Spy System:** You can catch Alastor and Katari in the ship's workshop using Jhaan for a brutal "cum inflation" experiment.

How to romance him?

Alastor does not engage in traditional romance. His dynamic is purely transactional and heavily rooted in extreme BDSM, humiliation, and non-consensual (or coerced) use of your body.

- **Submissive / Slave Route:** Acquiesce to his twisted games. Whenever you need his engineering skills (whether for a mining pickaxe or rebuilding a city), allow him to set the price. He thrives on your desperation. Let him lock you in his experimental restraints and sell your body to others for his own amusement; enduring this extreme degradation is the only way to satisfy his sadistic nature.

- **Dominant Route:** There is no true dominant route with Alastor, as he is always the one designing the traps and holding the keys. However, taking his massive dragon loads and surviving his grueling endurance tests without breaking earns you a sick, twisted form of respect from the brilliant engineer.
