“Excuse me? Insert my pristine cock in your dirty holes? Stick to your mouth.”

Appearance

A sturdy, majestic, and highly arrogant equine who originally boasts the high-quality gear fit for a King's personal stables.

Personality

Proud, arrogant, and incredibly demanding. Charles carries himself with the extreme elitism expected of a royal steed, looking down on the "peasant" and "rabble" humans around him. Despite his snobbery, his loyalty can easily be bought if someone is willing to properly service his massive needs.

Story

"Originally serving as King Edward's personal mount, Charles is a high-status horse in Harmonia. Through interaction and persuasion (mostly by servicing him), the player can convince Charles to abandon his royal duties and become their dedicated mount for traveling the Sunrise Valley."

Spicy Scenes

- **The Stables:** You can visit Charles and offer to service him. You blow him while he spits out an endless, thick stream of spunk, making your belly swell until you look pregnant and leaving you bloated with horse cum.
- **The Royal Theft:** When King Edward confronts Charles about abandoning him and asks what you could possibly offer that is more important than saving his life, Charles bluntly informs the King that he's leaving because you "*give really good blowjobs.*"
- **Riding Bareback:** He allows you to ride him to travel anywhere across Harmonia in minutes, but strictly demands daily attention to his cock as payment for his services.

How to romance him?

Charles is an animal companion/mount, so traditional romance is off the table, replaced entirely by a transactional sexual dynamic.

- **Submissive Route:** To win his loyalty, you must swallow your pride and act as his personal fluffer. By visiting him and giving him head, you prove your worth to him. If you do a good enough job taking his massive loads, he will abandon King Edward to become your personal fast-travel mount across Harmonia, demanding you empty his balls daily.
