Role in the Story

Hakkon is a recruitable crew member. He is initially encountered as the final boss of the [Eradicate the Sub-Guh'Nirs](#) quest. Hakkon is the Alpha of the Sub-Guh'nirs

Appearance

A massive, terrifying subterranean monster originally found lurking in the subway tunnels of Akra Leuka. He has a grotesque, beastly appearance with huge, intimidating jaws that easily terrify normal citizens. Despite his monstrous exterior, he acts like a giant, affectionate dog when tamed. He wears a simple loincloth that struggles to contain his bizarre, multi-phallic anatomy.

Personality

Despite his horrifying appearance, Hakkon is incredibly docile, simple-minded, and desperate for affection. He speaks in broken, childlike sentences (referring to himself in the third person) and wants nothing more than to be a "good boy" for the Captain. He is deeply loyal to you, viewing you as his true "Alpha."

Story

"Hakkon is actually the Sub-Guh'Nir Alpha that Galiano orders you to exterminate in the subway facilities of Akra Leuka. Instead of killing him, you can choose to spare him and take him aboard your ship. Later, he causes a massive panic in the town of Eldor on Harmonia when the villagers mistake him for a bloodthirsty beast, forcing you to step in and clear his name."

Spicy Scenes

Hakkon's scenes are wild and embrace extreme monster-fucking anatomy:

- **The Bottom Route (Monster Breeding):** If you submit to him, Hakkon unleashes his terrifying alien biology. He uses his multiple cocks to relentlessly stretch your holes, constantly swapping them out as he finishes. Finally, he brings out his "two main cocks," pushing one so deep into your ass that you can visibly see it bulging out of your stomach, filling you with enough thick jizz to "fill you 10 times."
- **The Top Route (Fucking the Beast):** You can catch him playing with himself and command him to "Stop fucking yourself and get that ass over here." He submissively presents his gaping, cum-oozing entrance to you. When you thrust inside, his powerful internal muscles clamp down, trapping your cock inside him until he milks you completely dry.
- **Arthur's Stretcher:** If Arthur is bound to the medical stretcher in the lab, you can use the TV Spy system to watch Hakkon eagerly mount the scientist.
- **The Dormitory (TV Spy):** You can catch him talking to Phoenix in the dorms. Phoenix admits his mouth waters just looking at Hakkon's loincloth, and the two make plans to hook up later.

How to romance him?

Hakkon's relationship is less about traditional romance and more about taming and protecting a misunderstood monster.

- **Recruitment (Sparing the Alpha):** During the "End the Sub-Guh'Nir's" quest in Akra's subways, after killing the initial waves, you must confront the Alpha. You must choose to spare him. Explain to Galiano that the creatures are intelligent and you are keeping the Alpha. He will then excitedly ask if he can be called "Hakkon."
 - **The Beast Hunt (Harmonia):** Take him to Harmonia. When the town of Eldor panics over a "beast" in the woods, you discover it's just Hakkon stalking you in the forest because he wanted to spend time with you but was afraid of his own scary face. Defend him from the local hunter, Thorne, and prove to the villagers that your monster is a good boy who obeys orders.
