Recruitable	No
Species	Human
Dick Size	Massive / Thick
Relationship	Master / Slave (Roles can be reversed)
Role	Sadistic Dominant Top / Obedient Submissive Bottom

> “I am a king, but first I am a warrior.

Appearance

A towering, muscular human with a blonde beard and a fierce, commanding presence. He wears a magical, gem-enchanted armor passed down through his family since the dawn of Harmonia. The armor is incredibly revealing, consisting mostly of a harness, shoulder pads, and a royal skirt, designed to provide absolute freedom of movement in combat. He also wears a relic necklace representing Helgrim, the god of warriors.

Personality

Edward is a brutal, sadistic, and hardened ruler who views kindness as a liability. His father taught him to be a tyrant from a young age—forcing him to execute a traitor at age seven and killing his childhood dog to make him a pair of gloves. This trauma forged him into a violent king who takes his frustrations out on others. However, if faced with someone stronger who refuses to submit, his royal pride can be utterly shattered, revealing a desperate, obedient submissive who secretly craves being conquered and owned.

Story

"**King Edward is the undisputed ruler of Harmonia. He rides a magical, talking Alicorn named Charles and rules his kingdom with an iron fist. When you encounter him, your relationship immediately becomes a vicious battle for dominance. You can choose to surrender to his brutal, degrading whims, or overpower him, humiliate him before his subjects, and turn the mighty king into your personal pet.**"

Spicy Scenes

Edward's scenes are intensely rough and depend entirely on the power dynamic established:

If Edward is the Master (Submissive Route):

- **The Charles Humiliation:** If you submit to him, Edward decides you need to prove your obedience. He forces you to your knees in front of his massive winged stallion, Charles. He violently shoves the horse's cock down your throat and forces you to swallow the stallion's load.
- **The Forest Breeding:** Edward tackles you to the forest floor, pinning you down and violently claiming your body. He aggressively breeds you, filling you with "royal seed."
- **The Public Walk of Shame:** After thoroughly using you, Edward grabs your hand and parades you completely naked and leaking his cum through the streets of Eldor. He forces you to endure the shocked stares, whispers, and bows of his subjects while you act as his obedient whore.

If You are the Master (Dominant Route):

- **Breaking the King:** You can challenge his authority and physically overpower him. You force the furious king to his hands and knees, making him crawl like a dog.
- **The Lake Punishment:** You violently fuck his ass near a lake, mercilessly stretching his hole while he tries to maintain his pride. You force him to admit that you own him, reducing the mighty ruler to a shaking mess who tearfully thanks you for slapping him.
- **The Royal Humiliation:** After painting his face white with your cum, you leave him entirely naked, exposed, and dripping with your seed in the center of the town square.

You walk away, leaving the humiliated king to face the shocked stares of his own royal guards and citizens.

How to romance him?

There is no gentle romance with King Edward; it is a toxic, violent clash of wills.

- **Submissive Route (The Royal Slut):** When confronted by his aggressive demands, choose to submit. Allow him to speak to you like trash, endure his slaps, and obey his degrading orders (including servicing his horse, Charles). Embrace your role as his property, and he will claim you as his favored pet.
- **Dominant Route (Conquering the King):** Refuse to submit to his tyranny. When he threatens you, strike back physically. Subdue him, slap him, and forcefully take control. To fully break him, you must relentlessly pound his ass, ignore his royal title, and publicly humiliate him until his body betrays him and he confesses that you are his true Owner.
