

Planets

Akra Leuka

- **Description:** An independent city-state orbiting a black hole from which it draws its power. It is a hub for various species, but is also home to a corrupt government and a thriving underworld. The city has multiple floors, with looming spires and docks on the lower levels. The first floor contains a Xeonian suburb, a casino, Galiano's Club, and various shops. The second floor features pristine white architecture and an artificial sun.
- **Notable Species:** [Xeonians](#), [Luxurians](#), [Sub-Guh'Nir](#), [Grikari](#), [Verdanti](#), [Sithyryans](#), and humans.
- **Resources:** Corrupted Energy Crystals, Pure Energy Crystals, Scrap, Hydraulic Gears.

Earth

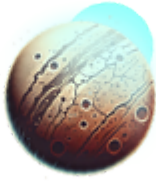

- **Description:** Once a blue and green planet, now a desert full of horrible mutants.
- **Notable Species:** Mutants.

Erebus-1

- **Description:** A small, rocky planet orbiting a brilliant blue star. It was once a vibrant world but was made lifeless by genetic experiments. Its atmosphere is thin, saturated with radiation, and has a metallic taste.

- **Notable Species:** None, as the planet is lifeless.
- **Resources:** Thauselite.
-

Harmonia

- **Description:** A strange, hidden planet filled with vibrant magic and a gentle, warm feeling. It is a world of lush forests, mountains, and ancient ruins.
- **Notable Species:** Humans, Elves, Goblins, and Vampires.
- **Resources:** Essence Hibiscus, Elven Leaf, Mist Morel, Bloodvine.

Hybris

- **Description:** The home planet of the Zareen, a constant field of war in which brute force is the most important social pillar.
- **Notable Species:** [Zareen](#).
- **Resources:** None mentioned.

Luxina

- **Description:** A paradise brimming with exotic and colorful nature. It is one of the planets constantly attacked by The Warlord. Giant trees grow above the atmosphere, giving it the appearance of a "cauliflower planet" from space.
 - **Notable Species:** [Luxurian](#) (divided into 3 races living at different altitudes).
 - **Resources:** None listed (Rotten Root drink comes from here).
-

Nova Nexus

- **Description:** A marvel of technology and the ultimate nexus for all species. This massive structure features a central sphere simulating a sky and three rotating rings:
 - **The Primordial Conclave** (politics/Chamber of Kings),
 - **The Confinement** (secure docks, Meta-Human Neighborhood, Diego's Condo), and
 - **Sanctuary** (safer docks).
- **Notable Species:** A diverse mix of all species in the galaxy.
- **Resources:** Carbon Fiber, Ceramic Composite, Adaptive Gravity Gel, Aerofoam, Voidglass.

Pangea

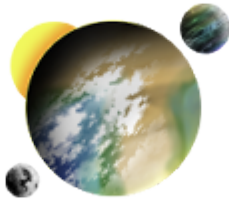

- **Description:** The last bastion of the rebels, Pangea gathers a large number of species, including those who used to inhabit Paradise.
- **Notable Species:** Humans, [Chon-Tan](#), and various feral creatures.
- **Resources:** None mentioned.

Paradise

- **Description:** A once-beautiful planet with exuberant landscapes. It is now completely asphalted, and its inhabitants have to pay for oxygen. It is feared by anyone who is not a Metahuman.
- **Notable Species:** [Metahumans](#).
- **Resources:** None mentioned.

Sithyrya

- **Description:** The land of lizards, a barren and rocky planet that is currently under attack by the Warlord. The capital city is Kavhar, and the planet's sky is obscured by a black and red Crimson Storm caused by the Warlord's presence.
- **Notable Species:** [Sithyryans](#), Graul, and Sand Wyverns.
- **Resources:** Scrap, Graul Scale, Sand Wyrm Scale.

Urukai

- **Description:** The land of the Uruk, a vast plain where you can breathe fresh air and there is such tranquility that you will not want to leave. The landscape is characterized by vast fields of purple grass known as the Whispering Plains. It has a main settlement called Aethergald, the Ofanna Wildlife Reserve, and the Loom Mountains.
- **Notable Species:** [Uruk](#).
- **Resources:** None mentioned.

Comet L-17

- **Description:** A tiny comet in a lifeless solar system that serves as a perfect hideout for space pirates. It is surrounded by a cloud of gas and heavy metals that interfere with communications. The surface temperature is near boiling.
- **Notable Species:** Pirates ([Sithyryans](#)).
- **Resources:** Thunderite.

Verdanti

- **Description:** The home planet of the Verdanti, where the land was once barren. Thanks to modern technology, the planet is now recovering.
 - **Notable Species:** [Verdanti](#).
 - **Resources:** None mentioned.
-
