“ I lie awake at night, thinking... what if you can't save them all? What if, in the end, you can only save one?

Appearance

A lean but muscular survivor shaped by years of scaling ruins and outrunning danger. He has pale skin, striking amber eyes, and fiery red hair. Under his open leather coat, he wears a complex black leather harness wrapping around his torso, tight black pants, and a brown jockstrap.

Personality

Terri is a cheeky, confident wasteland scavenger who hides his deep insecurities behind sarcasm and thrill-seeking. Having lived his entire life in a place called "The Nest," where he only ever saw

the sky through a layer of radioactive haze, he harbors an intense desire to see the stars. He struggles with intense survivor's guilt, admitting he would selfishly leave his people behind just for a chance to explore the galaxy. Sexually, he loves the thrill of getting caught in public and becomes desperately submissive when manhandled.

Story

"Terri is a local scavenger who brazenly steals the Captain's weapon. When confronted in the underground corridors, he attempts to extort sexual favors in exchange for its return. After joining the crew, he is mesmerized by the vastness of space but struggles with the guilt of abandoning his wasteland home."

Spicy Scenes

Terri's scenes heavily revolve around the negotiation for your stolen weapon and the thrill of public exposure:

- **The Extortion (Submissive / Bottom Route):** If you agree to his terms, Terri forces you to your knees in a semi-public corridor alcove. You must suck his cock while listening to the footsteps of passersby. However, when he finishes in your mouth, you can aggressively grab him and kiss him, forcing him to swallow his own cum. He surprisingly admires you for having the nerve to do it.
- **The Interrogation (Dominant / Top Route):** You can refuse his deal and slam him against the wall. You force him to strip to his harness and jockstrap, violently twisting his nipples while he desperately sucks your cock. After you unload into his mouth, you shove his face into the cold metal floor and force him to lick up his own leaked pre-cum and semen like a "thirsty little thief".
- **The Lab Experiment (TV Spy):** You can use the TV Spy system to watch Arthur experimenting on Terri in the med-bay. Arthur forces Terri to edge, brutally ruining his orgasm by pulling away at the last second, leaving the scavenger a trembling, whimpering mess.

How to romance him?

Terri requires a mix of physical dominance and emotional reassurance.

- **Getting the Weapon Back:** When confronting him in the corridors, you establish your physical dynamic. Whether you submit to his extortion or dominate him against the wall, giving him a thrilling, semi-public sexual encounter earns you the weapon and his respect.

- **The First View:** Once he is on the ship, take him to the large viewport in the dormitories. Let him press his face against the glass to see the stars and empty space for the first time.
 - **Calming his Guilt:** When he confesses his deep fear that he is a terrible person for wanting to leave the Nest behind, reassure him. Tell him that "*Knowing it is the first step to controlling it. It's the part of you that's kept you alive.*" This validates his survivor instincts without judging him.
