

# Version 0.44

## NEW CONTENT

- Day 6 at **university**. You get more content if you saved the vampire (Alexander).
- After classes there are some things you can do:
  - Go back to Virgil's to learn new potions.
  - Visit Riordan to try the healing spell.
  - Talk to Edward at the Peaceful Panda Inn
- New quest on the Notice Board (Eldor): Hunt huargos (repeteable).

## MINOR CHANGES

- Now you can add descriptions to your save files or delete them. You can disable this in "Options" if you don't want to write everytime you save your game.
- New 16 potions that you can craft in the cauldron with cum. The process removes the lust penalty and makes them usable for your crewmates.
- New Spell -> Heal Wounds. You can select the target if you have crew members in your party.
- New enemy: Huargo
- New location: Edward's Palace

## ART

- Huargo sprite.
- I changed/add a few backgrounds and icons

## BUG FIXES

- Temporary ability potions were not working (just strength)

That's all! Hope you like it!

My artist is still making the sprites of the MC, it's a lot of work because they are 6 new characters (3 men, 3 women) with face and hair variations. It will be finished (at least the male version) in v0.45

---
